CONFERENCE ABSTRACT

2030 residential and care model of Curaviva Switzerland: From theory to implementation

19th International Conference on Integrated Care, San Sebastian, 01-03 April 2019

Michael Kirschner, Markus Leser
CURAVIVA Switzerland, Switzerland

System transformation calls for new ways of thinking and problem-solving approaches. Therefore, CURAVIVA Switzerland launched its 2030 Residential and Care Model for Elderly People (80+): Care homes are no longer "large buildings", but decentralised service provider based on a social space concept that enable elderly people reliant on care to continue to live independently in their preferred environment. The model, its dissemination and large scale implementation projects are presented.

Keywords: 2030; residential; care model; elderly people
